

## DINITROL 81 Aerosol

Universal Protection

### Characteristics:

- Milky Transparent
- Tack free
- Wax film
- Against galvanic corrosion
- Permanent or temporary
- Thixotropic

### Applications:

On evaporation of the solvent, DINITROL 81 Aerosol leaves a transparent, hard and waxy film, ideally suited as a protective coating, affording easy visual inspection of the metal surface, reading of labels, numbers, etc.

DINITROL 81 Aerosol is intended for protection, in storage and in transit, of finished surfaces of steel and of other metals, particularly when a colourless, transparent and tack-free film is desired. DINITROL 81 Aerosol may also be used for protection of lacquered surfaces withstanding white spirit and similar solvents, e.g. different types of tooling and equipment engines and vehicles.

### Method of use:

DINITROL 81 Aerosol is applied by spraying with the can at approximately 30 cm off the object. The ideal temperature for the application is 15 – 20°C. During warehousing, application and drying, the measures to be taken are the same as those applying to paints and lacquers.

### Technical properties:

|                              |                       |
|------------------------------|-----------------------|
| Colour:                      | transparent           |
| Type of film:                | waxy                  |
| Density at 20°C:             | 720 kg/m <sup>3</sup> |
| Dry matter content (conc.):  | 7,9% by weight        |
| Flash point:                 | < -20°C               |
| Aromatic content in solvent: | < 0,5%                |
| Rec film thickness:          | 10 µm                 |
| Drying time:                 | 30 min.               |
| Effect on car paint:         | none                  |
| Removability:                | Hydrocarbon solvents  |
